Finance Transactions Dashboard

This dashboard analyzes more than 12,000 financial transactions from October 2022 to October 2025, linked to 500 customers, 200 accounts and 50 products. It shows how transactions perform over time, which channels, payment methods and regions drive activity, and how customers, products and accounts contribute to overall results.

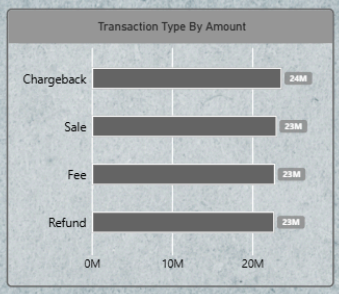

Use the navigation buttons to explore the dashboard:

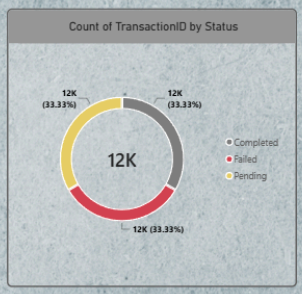

- **Transaction Performance:** trends, transaction types, status, channels and regions
- **Customers & Products:** customer segments, top customers, product categories and category ranking over time
- **Key Insights & Summary:** main findings and recommendations

Insights
Key Insights & Summary
1. Transaction health needs attention
• Transactions are split evenly: 33.3% Completed, 33.3% Failed and 33.3% Pending.
• Only one in three transactions completes successfully, so reducing failures and clearing pending items is the biggest opportunity.
2. Chargebacks are as large as sales
• Chargeback has the highest total amount (24M), slightly above Sale (23M), Fee (23M) and Refund (23M).
• Chargebacks and refunds together are about as large as the sales they offset, which points to risk in payment disputes and returns.
3. Sales peaked in 2024
• Sales amount grew from 6.4M in 2022 to 30.2M in 2023 and 31.5M in 2024, then fell to 24.2M in 2025.
• The 2022 and 2025 figures cover only part of those years (data runs from October 2022 to October 2025), so the 2025 dip should not be read as a full-year decline.
4. Channels and payment methods are balanced
• All four channels (InStore, MobileApp, Online, Partner) contribute equally at 92M each.
• Credit Card leads payment methods slightly (2.1K transactions), while UPI, Debit Card, NetBanking and PayPal each have about 2.0K and Wire has 1.9K.
• No single channel or payment method dominates, so there is no single point of dependence.
5. Apparel is the top category
• Apparel earns the most (23M), ahead of Software, Services and Electronics (about 19M each). Food is lowest at 13M.
• In the ribbon chart, Apparel holds the top position in 2023, 2024 and 2025.
6. Customer base is spread across three segments
• Of 500 customers, SMB is the largest segment (182, 36.4%), followed by Enterprise (160, 32%) and Retail (158, 31.6%).
• The top customers, Alex Jones (1.65M) and Liam Smith (1.63M), lead by a clear margin over the rest of the top 10.
7. Product performance is tightly clustered
• The top products, Product_44 (2.13M), Product_39 (2.11M) and Product_33 (2.09M), are separated by only a small margin.
• No single product dominates revenue.
